Allergen and additive
information

Allergen information

The list of allergens refers to the 14 main triggers of allergic food reactions (allergies and intolerances). The allergens that must be labeled are legally defined in the Food Information Regulation (LMIV No. 1169/2011). They are listed if the aforementioned substances or products made from them are present in the final product in either modified or unchanged form. Ingredients containing the 14 main allergens are processed both in the production of our ingredients and in the preparation of our products. Therefore, we cannot completely rule out unintentional and technically unavoidable contamination of products that do not contain this allergen as an ingredient. This so-called cross-contamination is not listed in the table.

The following 14 main triggers of allergic food reactions are declared:

1. Cereals containing gluten: wheat, spelt, rye, barley, oats
2. Crustaceans and products thereof
3. Eggs and products thereof
4. Fish and products thereof
5. Peanuts and products thereof
6. Soybeans and products thereof
7. Milk (including lactose) and products thereof
8. Nuts: almonds, hazelnuts, walnuts, cashew nuts, pecans, Brazil nuts, pistachios, macadamia or Queensland nuts and products thereof
9. Celery and products thereof
10. Mustard and products thereof
11. Sesame seeds and products thereof
12. Sulphur dioxide and sulphites
13. Lupins and products thereof
14. Molluscs and products thereof

All information is subject to change without notice and may vary seasonally. Gastro Trends Hannover GmbH regularly verifies all information.
